C0PYSTAR SECTOR FORMAT

```
========================================================
| XX   |            DESCRIPTION           |    TYPE    | SIZE |
========================================================
| AC   | "C0PYSTAR" sector marker         | ASCII/text |  08  |
| AF   | Format version                   | ASCII/decimal | 01 |
| AD   | "DATA" data sector marker        | ASCII/text |  04  |
| AM   | "META" metadata sector marker    | ASCII/text |  04  |
| AS   | Decimal sector size              | int        |  04  |
| BH   | Stored-file-SHA512               | bytes      |  64  |
| BL   | Stored-file-length               | long       |  08  |
| CN   | Sector-number                    | long       |  08  |
| DD   | Payload                          | bytes      |  ..  |
| FH   | Sector-SHA512                    | bytes      |  64  |
--------------------------------------------------------
|         FORMAT DATA TOTAL              | bytes      | 161 |
--------------------------------------------------------
| 1. DATA SECTOR (BYTES):     [AC AF AD AS BH BL CN DD FH]     |
| 2. METADATA SECTOR (JSON): [AC AF AM AS BH BL CN DD FH]      |
| 3. Payload = SectorSize – 161                               |
--------------------------------------------------------
```

C0PYSTAR1 DATA SECTOR FORMAT/PAYLOAD
Sector Marker: C0PYSTAR1DATA
Payload: Filename data (bytes)

C0PYSTAR1 METADATA SECTOR FORMAT/PAYLOAD
Sector Marker: C0PYSTAR1META
Payload: Filename with/without relative path (UTF-8)
